# Hurricane Preparedness Week (May 5-11, 2019)

FEMA

## Determine Your Risk

- Hurricane Preparedness Week is your time to prepare for a potential land-falling tropical storm or hurricane:
- **Find out today what types of wind and water hazards could happen where you live**, and then start preparing now for how to handle them
- **Hurricanes are not just a coastal problem**; their impacts can be felt hundreds of miles inland, and significant impacts can occur without it being a major hurricane

**MAY 5 - Determine Your Risk**  
Hurricanes bring many hazards to U.S. coastlines and inland areas, including storm surge along the coast, inland flooding due to heavy rainfall, tornadoes, strong wind, rip currents and large waves.

- Storm Surge
- Rip Currents
- Inland Flooding
- Tornadoes
- Strong Wind
